THE MIZRACHI HOSPITALITY MAY BE ABLE TO ASSIST YOU IN ORGANISING HOSPITALITY FOR PESACH MEALS.

PLEASE EMAIL HOSPITALITY@MIZRACHI.COM.AU.

IF YOU NEED TO GET A LOVED-ONE TO YOUR SEDER AND WOULD LIKE TO BORROW A WHEELCHAIR,
CALL THE MIZRACHI OFFICE ON 8317 2555.

WARNING: INTERNATIONAL PESACH LISTS ARE NOW ACCESSIBLE VIA THE INTERNET & SOCIAL MEDIA. THOUGH PRODUCTS WITH THE SAME NAME APPEAR AS BEING SUITABLE FOR PESACH IN OTHER COUNTRIES, THIS MAY NOT APPLY TO SIMILARLY NAMED PRODUCTS AVAILABLE AND MANUFACTURED IN AUSTRALIA AND NZ. THIS GUIDE CONTAINS INFORMATION SPECIFIC TO AUSTRALIA AND NZ CONDITIONS.

USING THIS GUIDE

- Products listed in this guide are either approved or supervised by Kosher Australia or by other recommended authorities, where the packaging may not have “Kosher LePesach” labelling. Where such labelling exists and is accompanied by one of the Approved Hechsherim (see page 8), it may be consumed on Pesach.
- The information contained in this guide is correct as at 12/3/23. For further updates, please visit our website (www.kosher.org.au) or visit our Facebook page facebook.com/kosheraustralia.

- This guide reflects the Ashkenazic tradition prohibiting the use of Kitniyos (legumes) on Pesach. Some Sephardic traditions allow the consumption of beans, rice, corn and millet. People following Sephardic traditions are encouraged to consult with their Rabbi re the suitability of products and acceptability of relevant *hechsherim*.
- While the actual consumption of 'gebrokhts' (matzah immersed in liquid), depends on custom, where possible we have noted the use of this for the benefit of segments of the community who do not eat gebrokhts on Pesach.

YUMI'S KOSHER SEAFOOD (STORE ONLY)

29 Glen Eira Rd, Ripponlea, 03 9523 6444. ONLY products carrying reliable Kosher for Pesach approval

GENERAL WARNINGS

Not all products in Pesach sections at supermarkets or specialty Kosher retailers are necessarily Kosher for Passover or even Kosher! In previous years, even reputable Kosher retailers have inadvertently placed non-Pesach products in Kosher for Pesach sections. Consumers are warned to check on the label for acceptability and NOT to rely on shop employees for advice on the Kosher status of a product.

ALPHA CHOCOLATES

Alpha Chocolates are not acceptable for Pesach unless carrying specific Kosher for Pesach labelling, as they are manufactured on the same production lines as *Chometz* and may contain *Chometz* ingredients.

CATERING

Only those caterers that carry FORMAL KOSHER FOR PESACH SUPERVISION are recommended. Some caterers and restaurants are claiming Pesach style production. These products are not recommended for Pesach use.

CHEESE

All Kosher hard and soft cheeses contain ingredients that may be unsuitable for Pesach and therefore may not be used unless accompanied by a reliable Kosher LePesach seal or logo.

CITRIC/ASCORBIC ACID/POTASSIUM SORBATE/SORBITOL

These ingredients which are common additives used in food production (food additives 202, 300, 330) may be derived from wheat and therefore *Chometz* or may be derived from corn and is therefore kitniyos. Sorbitol is a common sweetener used in oral care.

CLAG PASTE

CLAG is *Chometz* and should therefore not be used. Note that CLAG Hobby, Bostik Blu-Tack, UHU Glue Stick, & Bostik Colour-Tack are acceptable for Pesach.

COSMETIC LOTIONS, CREAMS AND OTHER SOLID PRODUCTS

Cosmetics generally need no special Pesach supervision. Those listing oats or wheat germ in their ingredients panel are not recommended. However, liquid products, particularly if containing alcohols which may be *Chometz* and products used for oral hygiene or application to the lips (including lipsticks) should be approved before use.

DIET PRODUCTS

Many diet products including diet Coke, Pepsi etc use artificial sweeteners which may be derived from Kitniyos and are therefore not recommended for Ashkenazim, even when carrying a Kosher for Passover certification.

EGG MATZAH ('MATZAH ASHIRAH')

So called 'egg matzah' may not be eaten on Pesach by healthy people. (Sick or elderly people should discuss the use of Egg Matzah with their Rabbi). MANISCHEWITZ TAM TAM CRACKERS (all varieties) with the OU-P symbol are made from *Matzah Ashirah* and should not be consumed during Pesach as per all *Matzah Ashirah*.

FRUITS - DRIED

Dried fruits and ground herbs and spices should only be used if bearing reliable Kosher for Pesach authorisation as oils and other processing aids that contain *Chometz* or Kitniyos may be used in the drying and packing process.

JUICES

Juices, including 'pure' juices, may use *Chometz* derived enzymes or production aids/additives or share equipment with production containing *Chometz* and must therefore have Kosher approval for Pesach. Claims that certain juices are pure juices may not include additives added by the suppliers of the juices to the final manufacturer. Therefore, only recommended juices should be consumed.

KITNIYOS CUSTOMS

Customs vary even within different Sephardi communities regarding the identification and permissibility of Kitniyos products. Consumers are reminded to carefully read the packaging on products bearing Kosher for Passover symbols. Many are marked 'Suitable for those that eat Kitniyos' (רַךְ לְאוֹכְלֵי קִטְנִיּוֹת) and may bear a *hechsher* from an approved authority that is only for year-round use and not for Pesach. These products are of course suitable for those of Sephardi descent and/or custom that do eat Kitniyos on Pesach. Members of the Sephardi community should accordingly consult with their Rabbi to ascertain the parameters of their particular *minhag*. (see warning on Rice.)

LABELLING

Any food or beverage that bears the words "Kosher LePesach", "Kosher for Passover" or a similar variation (even with Hebrew writing) but does not have a reputable Kosher symbol or Rabbinic name printed on the label, or is not listed as suitable for Pesach in this Guide should not be used for Pesach. This applies whether the food or beverage is locally made or is manufactured overseas (especially from Israel). Numerous instances of false and misleading labels have been uncovered in previous years e.g. dates. Note: 'P' on a logo refers to Pesach and not Pareve.

LAFFA/SOFT MATZA

So called 'Laffa matza' without reliable Kosher supervision is periodically sold. Laffa Matza is not suitable for Pesach use and should be treated as Chometz. Those who have inadvertently used this 'laffa matza' should seek guidance from their Rabbi re kashering of utensils.

MATZAH

MUST be marked as being Kosher for Pesach/Passover and carry reliable Kosher certification. Snider Carmel matzah without the Kosher Australia 'Kosher for Pesach' symbol are Chometz.

MEAT

Plain frozen kosher meat that is not formally certified for Pesach should not be used in the first instance as it may have come in contact with actual Chometz during smallgoods production. Please consult your Rabbi if Kosher for Pesach meat cannot be obtained.

MILK (DAIRY)

For those who consume Cholov Stam (regular kosher) milk, please take care to read the conditions in the relevant section. Some milks are processed on shared equipment with oats which presents a problem for Pesach.

NON-FOOD ITEMS

In general, Chometz and Chometz derivatives which are unsuitable for human or animal consumption (e.g. inedible and/or toxic substances) are not considered Chometz insofar as the prohibition against using Chometz products on Pesach is concerned.

NUTS

Varieties of nuts that are acceptable on Pesach (see section on kitniyos) should be purchased in the shell, raw. Roasted and fried nuts without Kosher for Pesach approval are not recommended. (Note: dry-roasted and fried nuts require reliable Kosher certification for year-round use.) It is recommended that shelled raw nuts be only purchased for Pesach with Kosher for Pesach approval.

PEELED VEGETABLES AND FRUIT

Often fruit and vegetable processors add chemicals to preserve colour and/or freshness which may be kitniyos or chometz derived. PEELED RAW vegetables and fruit should therefore be purchased from verified sources where possible.

PET FOOD

Many pet-foods contain actual Chometz and may not be used on Pesach. Some contain mixtures of meat and dairy and are prohibited year-round as well due to bossor v'cholov considerations. Please see the section on **Pet Food**.

PLAY-DOH

Play-Doh is Chometz and must be sold with all other Chometz.

PLANT BASED MILKS

Most plant based milks contain flavours, oils and sweeteners that are kitniyos and may even be chometz. In addition, most facilities process oat milks and do not change the cooking water or kosherize afterwards. At this stage, there are no certified or even approved plant milks that are locally made. However, there are simple recipes to make various nuts milks.

RICE - POTENTIAL CHOMETZ

Sephardim, or those given special permission by their Rabbi to eat kitniyos on Pesach (such as very young children or those who are ill) should note that some imported rice varieties are known to have been sprayed with a wheatgerm oil or other Chometz coatings to stop rice grains clumping. This type of rice is strictly not kosher for Pesach even for those who otherwise are permitted by their custom or Rabbi to eat kitniyos. Sunrice rice varieties marked 'product of Australia' are not coated and are therefore suitable for Pesach use by those who are permitted to use rice on Pesach by custom or by Rabbinic dispensation. The Ben Ish Chai recommends that rice should nevertheless be checked three times for any chaff or contaminants.

SMOKED SALMON

Locally produced smoked salmon brands that were previously marked as acceptable for Pesach are no longer recommended due to changes in production. Please check under fish for approved brands.

SPECIFIC PRODUCTS

Some product 'malfunctions' from previous years:

1. KOSHER FOR PESACH **BAMBA** from Israel is not suitable for Ashkenazim and clearly marked as being suitable for those who follow Sephardi custom as it is made from Kitniyos.
2. **MANISCHEWITZ TAM TAM CRACKERS** even when bearing OU-P are made from Egg Matza and only permitted for the sick or elderly in consultation with their Rabbi.
3. **ACHLA, SABRA & YARDEN TAHINA & humus dips** are sold widely. These products are Kitniyos and NOT suitable for Ashkenazim.

VINEGAR

Vinegar may be derived from a variety of sources - apples, sugar, sugar beets, corn/maize, grape, milk and wheat. Imitation vinegar is synthetically produced. In Australia, the main sources of white vinegar are sugar and wheat (which is chometz). As such, vinegar must be Kosher approved for Pesach. Imitation vinegar poses no kashrus concerns for Pesach.

VITAMINS

Vitamins and mineral supplements MUST have specific Kosher for Pesach approval as they are often derived via fermentation from wheat or corn (e.g. Ascorbic Acid).

WINE/GRAPE JUICE

Not all wines and grape juices are mevushal (cooked). Consumers should check the label on the product carefully as the handling of non-mevushal wines differs from that of mevushal wines. The word 'MEVUSHAL' or מבושל must appear on the label. (Otherwise one must assume that wine/juice is not mevushal.)

Not all wines and grape juices are Kosher for Pesach – please check the certification carefully for the words 'Kosher for Pesach/Passover'.

UNFLAVOURED MINERAL WATER/SODA WATER

All mineral and soda water brands have carbonation added. In Australia, a common source of carbonation is from wheat fermentation which is not recommended. Only the listed unflavoured mineral and soda waters brands should be used.

APPROVED HECHSHERIM

Below is a list of some of the international Rabbinic symbols that Kosher Australia permit for Passover use which have been sighted at local retailers. Imported products may be used on Pesach if the product label has one of the following logos and is also marked with a "P" or otherwise clearly marked as Kosher for Pesach. Where the hechsher indicates that the product contains Kitniyos, or that it is not suitable for those who do not eat Kitniyos on Pesach, then such products are not permitted for Ashkenazim on Pesach. Kosher Australia follows the Ashkenazic custom and has listed only agencies following similar customs with respect to Pesach.

NOTE: Omission of a Rabbinic authority does not imply that it is not acceptable for Pesach. Regarding Rabbinic authorities not listed, please contact Kosher Australia. Please note that some may allow the use of peanuts, peanut oil, sunflower oil, safflower oil or canola (rapeseed) oil which Kosher Australia considers as Kitniyos.

MALTODEXTRIN	WHEAT/CORN DERIVED		

KITNIYOS & OTHER CUSTOMS

While the five grains – wheat, barley, spelt, rye and oats - once they have been fermented, are prohibited on Passover, use of various other raw fruit, nuts and vegetables and their derivatives is subject to many customs.

The most prominent and accepted of these customs is the prohibition on eating "Kitniyos".

The Mishnah Berurah (453:6 & 464:5) cites **three** reasons for the custom:

1. Kitniyos are harvested and processed in the same manner as Chometz,
2. Kitniyos are ground into flour and baked just like Chometz [so people may mistakenly believe that if they can eat Kitniyos, they can also eat Chometz],
3. Kitniyos may have Chometz grains mixed into it [so people who eat Kitniyos may inadvertently be eating Chometz].

To assist the Ashkenazic kosher consumer, Kosher Australia has compiled a list of fruits, grains and vegetables and noted their useability for Pesach. The list below refers to fresh, unprocessed products only.

PEELING FRUIT & VEGETABLES

Some have the custom to peel all fruit and vegetables due to concerns regarding coatings such as waxes and various sprays and will not eat any vegetable or fruit that cannot be peeled.

KITNIYOS LIST

Note: Many of the items below are subject to inspection for insect infestation.

PESACH PRODUCT GUIDE

It is recommended that all food products used at Pesach should be certified as Kosher for Pesach by a reputable rabbinic authority. However, Kosher Australia and other reliable Kosher authorities have ascertained that some general products are Chometz free and Kitniyos free without being formally certified. Please use the following key when using the Passover buying guide.

NOTE: Products listed as suitable but not certified for Pesach are produced at facilities that are supervised by Kosher Australia and pose no Pesach concerns but are not formally certified for Pesach.

SYMBOLS:	
N	PRODUCT INFORMATION IS FROM ANOTHER AGENCY REFERENCED BY THE NUMBER. IF THERE IS NO NUMBER, THE PRODUCT IS INVESTIGATED BY KOSHER AUSTRALIA
P	PRODUCT IS PAREVE
K	PRODUCT CONTAINS KITNIYOS
D	PRODUCT IS DAIRY (NOT CHOLOV YISROEL UNLESS OTHERWISE NOTED)
#	PRODUCT IS OF MEHADRIN STANDARD (IF DAIRY, IT IS CHOLOV YISROEL)
KLP	PRODUCT MUST CARRY SPECIAL KOSHER FOR PESACH SYMBOL

NON MEHADRIN

Non mehadrin food products **MUST** be new, unopened products and should be purchased before the latest time to sell one's Chometz on Erev Pesach to allow for bittul (nullification) of possible inadvertent chometz contamination.

BITTUL

Bittul is acceptable prior to Pesach (when Chometz is permitted) but is not allowed on Pesach when even the tiniest amount of Chometz is forbidden. Purchasing before Pesach ensures that the product was made before Pesach and any bittul would be bedieved (post fact) permitted.

INFORMATION FROM OTHER KOSHER AUTHORITIES:

To increase the usefulness of this Guide, we have included information from other Kosher Authorities including products that are suitable for Pesach but do not carry any specific marking. A number following the product or brand or information acknowledges the source of the information.

The following list is a **KEY**:

1. The Kashrut Authority, NSW, Australia
2. Rabbi A. Adler, Gateshead, UK
3. Star-K, Baltimore, USA
4. Rabbi YM Levinger, Basle, Switzerland
5. London Beth Din, London, UK
6. Kehilla Kosher, CA, USA
7. Orthodox Union, NY, USA
8. Chicago Rabbinical Council, Illinois, USA
9. Rabbi G Bess, California, USA
10. Kashruth Council of Toronto, Canada
11. Kosher Alef, Mexico
12. Adass Vaad HaKashrus, Victoria, Australia
13. Rabbi A. Hazan, Milan, Italy
14. OK Kosher Certification
15. Kedassia, UK
16. Kosher Check, Canada
17. Beth Din of Netherlands
18. Manchester Beth Din
19. Badatz Igud Rabonim, UK
20. Kosher Kiwi, Auckland/Wellington, NZ

ALCOHOL

All liquors and alcohols require kosher for Pesach approval and should carry the appropriate Pesach symbol from a reliable authority. The following has been approved with a formal Pesach certification.

BROWN FORMAN TEQUILLA MEXICO[®]	
TEQUILA EL JIMADOR BLANCO 100% AGAVE	P
TEQUILLA HERRADURA PLATA 100% AGAVE	P
MEZCAL[®]	
MVM VERDE MOMENTO	P

SIGNATURE DRY GIN	P#KLP

BABY FORMULA

In line with the rulings of many reliable authorities, baby formula containing Kitniyos is allowed for use during Pesach, even for Ashkenazim. The following baby formulas contain no actual Chometz but may contain kitniyos. All dairy formulae are not Cholov Yisroel. All formula preparation and clean up should be in a separate area and separate utensils to normal Pesach food production. The items in this category are **not** for otherwise healthy adults.

DAIRY PRODUCTS - BUTTER, CHEESE & YOGHURT	
<i>CHEESE: All cheeses require Kosher for Passover approval due to the use of potentially chometz derived/fermented acids, cultures and rennet. Rennet-set cheeses (e.g. cheddar, swiss, brie, feta, haloumi & camembert) are also subject to the laws of Gevinas Yisroel and require reliable batch supervision.</i>	
<i>CREAM: Cream can be thickened with gums that may have been co-processed with chometz and/or gelatine. Milk powders may be added.</i>	
<i>YOGHURT: Yogurts contain flavours, milk powders & cultures that may contain, or may be derived from, chometz ingredients</i>

FISH (RAW & ROE)

All frozen or raw whole kosher fish species (check the current Kosher Australia Food Guide/App for Kosher species) without additives are acceptable. Note that Ling varieties including Cape Rockling are not considered to be Kosher species.

When asking a fishmonger to fillet fish for Pesach, consumers are advised to bring their own knives and cutting board and watch the worker fillet. The fish should then be thoroughly washed.

Varieties listed below which are not marked with # (Mehadrin) should be rinsed before use.

MATZAH & MATZAH MEAL

Matzah MUST be marked as being Kosher for Pesach/Passover and carry a reliable Kosher for Passover certification.
 WARNING: Egg matzah may not be eaten on Pesach. (Sick and elderly people should discuss the use of Egg Matzah with their Rabbi). MANISCHEWITZ TAM TAMS (OU-P) are made from egg matzah.

MILK & MILK ALTERNATIVES	
Unsupervised flavoured and unflavoured low-fat milk are not acceptable as they may contain additives and vitamins that are not Kosher for Pesach.	
In the first instance it is recommended to consume Cholov Yisroel milk under formal Pesach supervision.	
The OU has advised that lactose-free milk where the only non Pesach additive is the enzyme, may be purchased prior to Pesach. For those who are lactose intolerant and observe Cholov Yisroel, please contact Rabbi Mordechai Gutnick directly at Rabbi.Mordechai.Gutnick@kosher.org.au to discuss milk options.	
Some Kosher stores carry imported plant-based milks with formal Kosher for Pesach supervision.	
All fresh milks that have been approved should be purchased before Pesach.

SALT & SPICES	
<i>Many authorities allow the use of all non-iodised salts^{7,8}.</i>	

Ground herbs and spices should only be used if bearing a reliable Kosher for Pesach approval as oils and other processing aids that contain Chometz or Kitniyos may be used in the drying and packing process. Whole spices are acceptable but should be inspected for any detritus. Note that certain spices are regularly sourced from Israel and as such require a formal certification for Pesach and year-round use e.g sweet paprika, coriander and tarragon.

WINE

Not all wine is Kosher for Pesach. Also, not all wine is Mevushal. Please check the label for the word 'mevushal' otherwise assume that the wine is not mevushal which has more stringent restrictions regarding handling. The following wines are produced under the strict supervision of Kosher Australia.

CHOMETZ-FREE KITNIYOS FOODS

For those who follow the Sephardi custom or have received Rabbinic dispensation to use kitniyos, the following items containing kitniyos have been ascertained to be Chometz free and may be used if purchased before Pesach.

WARNING: Gluten free products may contain actual chometz ingredients.

PET CARE

Many pet foods include wheat, wheat germ, bakers dried yeast or barley that are prohibited on Pesach as they are Chometz. Others contain cheese, kefir, yoghurt, lactobacillus cultures or milk that are dairy and when combined with beef, lamb, veal, goat or mutton are prohibited year-round due to Bossor V'Chalav (prohibited Dairy/Meat mixtures). Please check the ingredients panel before purchasing pet food. Note that pork, rabbit, & kangaroo are acceptable even with dairy components. Similarly, kitniyos is acceptable for pets and animals.

If an ingredient is listed as cereals or grains without specification, it is assumed to be Chometz

HAMSTERS, GUINEA PIGS, GERBILS & RABBITS

This advice is courtesy of the Star-K.

Best to feed pure alfalfa pellets. Make sure it is pure alfalfa since it is common to add grains. Dried alfalfa may also be given. This can be supplemented with a mixture of cut-up fruits and vegetables – carrots, broccoli, grapes, apples, melon, kale, parsley, oranges, celery, dry corn, sunflower seeds & cabbage.

Guinea pigs especially will benefit from kale, parsley and oranges.

Hamsters especially will benefit from apples.

Oaten hay maybe used if all the oat grains are stripped away before Pesach leaving just the stalks.

MEDICINES & PHARMACEUTICALS: ‘OVER THE COUNTER’

Reviewed by Rabbi Kasriel Oliver

IMPORTANT WARNING: Please note that medicine prescribed for life-threatening or potentially life-threatening conditions may NOT be unilaterally discontinued or changed even if known to contain Chometz. Your doctor and rabbi must always be consulted regarding the best course of action to ensure Pesach observance while not G-d forbid endangering your life or health. The Rabbinic Board of Kosher Australia has developed the following guidelines for medications on Pesach.

All capsules, insoluble tablets and NON-chewable tablets <i>Though it is preferable to use a chometz free medicine if equally effective and readily accessible</i>	Acceptable
All chewable medicines	Pesach approval required
All eye drops and/or ear drops	Acceptable
All gel oral medicines	Pesach approval required
All liquid oral medicines	Pesach approval required
All medicines applied to the gums, lips or teeth	Pesach approval required
All nasal sprays	Acceptable
All puffers (inhalers/turbuhalers)	Acceptable
All soluble medicines	Pesach approval required
All non-edible topical medications (creams, ointments, sprays & lotions) & suppositories	Acceptable
Vitamins	Pesach approval required

Vitamins MUST have specific Kosher for Pesach approval as they are often derived via fermentation from wheat (e.g. Ascorbic Acid). Furthermore, vitamins and other non-essential pharmaceuticals, unless on doctor's orders or by prescription, are usually not classified as a medicine for an existing or potential genuine ailment or illness. As such they do not receive the same leniencies applicable to medicines and almost all authorities therefore say they should not be used without investigation to ensure they are Chometz-free.

Items listed below have been checked for Pesach 2023/5783. The following listed products are only ‘over the counter’ medications which are available in Australia based on our best information. This list is based on correspondence with manufacturers, information from Government databases, or information from overseas Kashrus authorities. For prescription medications contact your Orthodox Congregational Rabbi.

No conclusion should be drawn from the omission of any product. The only products listed are those for which we have investigated, have sufficient information and are currently produced and sold. Decisions are generally based on the testimony of the firms. **No responsibility is accepted for advisability or efficacy of medicines listed.**

WARNING: All medicines should be used in separate utensils to normal Pesach utensils.

Wishing you a Kosher & Freilechen Pesach

KASHERING

Rabbi Mordechai Gutnick, Rabbinic Administrator

The Torah commands us that we may not eat or use *Chometz* on Pesach. This prohibition also extends to not even keeping *Chometz* in our possession for the duration of the festival. (See Shmos 12:14-20.)

In the weeks before Pesach the house and particularly the kitchen and eating areas must therefore be thoroughly cleaned to remove all traces of *Chometz*. Stoves and ovens, pots and pans, dishes and other eating utensils which have been used for *Chometz* throughout the year, cannot be used on Pesach. They must be thoroughly cleaned and stored away in a place and in a manner that ensures that they will not be used inadvertently on Pesach. Some utensils can be "*kashered*" through various kashering procedures so that they can be used on Pesach as well. This article deals with preparing the house removal of *Chometz* and kashering. Any questions arising out of circumstances not covered by this guide should be directed to your Rabbi or to the Kosher Australia office.

KASHERING: METHODS OF CLEANING & KASHERING

There are seven basic methods of preparing and kashering items for Pesach use. The *kashering* required for any particular item or utensil depends on how that utensil came in contact with *Chometz*. The general rule is that the cleaning or *kashering* needs to match the manner in which the item became contaminated by *Chometz* in the first instance.

NOTE: ALL KASHERING USUALLY MUST BE COMPLETED BY THE TIME FOR REMOVAL OF CHOMETZ ON EREV PESACH.

THIS YEAR THIS LATEST TIME IN MELBOURNE IS 11.24 AM WEDNESDAY, 5TH APRIL 2023

The following methods of *kashering* will be referred to in the course of this article:

METHOD #1: CLEANING

Some utensils require only a thorough cleaning to remove any *Chometz* that may adhere to the surface of the utensil. This is usually when the utensils have not come in contact with *Chometz* through the medium of heat. The cleaning should be thorough and with the aid of an effective and strong detergent.

Items in this category include pantry shelves and refrigerators.

METHOD #2: COVERING

Some items even if used with hot *Chometz* need only be cleaned of surface dirt and then covered with a suitable covering to create an effective barrier between them and the Pesach foods or utensils they will come in contact with.

Items in this category include tabletops, serving counters, and in certain circumstances, stove tops.

METHOD #3: "MILUYV'IRUY" - SOAKING

Some utensils, particularly those that may be damaged through the application of heat, may be *kashered* by completely filling them or immersing them in cold water for 72 hours. The water must be changed every 24 hours – so that effectively the utensil is soaked for three separate soakings of 24 hours each. The vessel in which the items are immersed should in the first instance be a vessel that itself is not *Chometz*. Items in this category according to certain authorities include glass and certain plastic utensils.

METHOD #4: "HAGALAH" (SCALDING WITH BOILING WATER)

Some utensils that have come into contact with *Chometz* via hot liquids (greater than 45 degrees Celsius) need to be *kashered* by immersing them in boiling water. The method used is as follows:

1. The item to be *kashered* needs to be thoroughly cleaned of surface dirt. Any item that has deep engravings or joints (such as cutlery with attached wooden handles) cannot be cleaned thoroughly and should not be *kashered* using this method.
2. The utensil to be immersed in *kashered* should not be used with heat for 24 hours prior to kashering.
3. Water should be brought to boil in a large pot that should in the first instance not itself be *Chometz*. (If a *Chometz* vessel is used it should not have been used for the past 24 hours). It is actually preferable to have a special pot designated for *kashering* use only.
4. The item to be *kashered* should be immersed in the boiling water. Tongs may be used to immerse the item - however the tongs themselves should not be *Chometz*. (The tongs should be immersed first in the boiling water so that they are wet when they come in contact with the item to be immersed.)
5. A number of items may be immersed in the vessel at the one time. However, care should be taken that each item is such a manner that the boiling water completely surrounds each item. Dropping them in one at a time helps facilitate this requirement.
6. If the water cools off and stops boiling during the immersion of the utensil it should be allowed to resume boiling while the item remains immersed.
7. The item should then be removed from the boiling water. (One may not pour out the boiling water leaving the item inside the utensil.)
8. Once removed from the boiling water the item should immediately be rinsed in cold water.

Items in this category include metal, wood, stoneware and according to some authorities, plastic utensils.

Items such as metal pots and pans that are too large to be immersed in boiling water should be cleaned and not used for 24 hours. They should then be filled to the brim with water that should then be brought to boiling point on the stove. A large pre-heated stone should be carefully dropped into the boiling water allowing the boiling water to run over the outside of the pot. The pot should then be emptied and rinsed with cold water.

METHOD #5: "IRUY IM EVEN MELUVAN" (SCALDING WITH WATER & A HEATED "STONE")

Some utensils that have come in contact with *Chometz* via hot liquids poured onto or into them, and not directly cooked on a fire, can be *kashered* by pouring boiling water onto them with the added use of a hot stone or metal pieces. Hot stones or metal tend to raise the temperature of the poured water back to boiling point even though it has been poured out of the original vessel in which it has been boiled.

1. The item to be *kashered* needs to be thoroughly cleaned of all surface dirt.
2. The item should then not be used with heat for 24 hours prior to the kashering.
3. Stones or small pieces of metal (such as large nuts or bolts) should be heated on an open fire and will need to be moved by means of tongs to the area or object where the boiling water is to be poured.
4. The heated stones or metal are placed on the item to be *kashered*, or if the heated objects will damage the surface, they may be suspended by means of the tongs just above the item to be *kashered*.
5. Boiling water should be poured directly from a kettle or other utensil (that has not been used in the past 24 hours) and must cover the entire surface of the item being *kashered*. The boiling water must come in contact with the hot metal or stones to ensure that its temperature remains as near as possible to the original boiling point.
6. The *kashered* area or item should then be washed down with cold water.

An acceptable alternate method of this form of *kashering*, particularly when *kashering* large areas such as sinks and counters is the use of a portable steam generator that raises the water and steam generated to 100 degrees Celsius or higher. The boiling water and the accompanying steam created and sprayed out by this apparatus is considered sufficient to be considered identical to the more conventional method of boiling water being poured out and heated back to boiling point on the surfaces being *kashered*. The hot pressurised steam acts in the same manner as the heated stone or metal in this regard.

Items in this category include metal sinks, metal and granite counter tops, and according to many authorities even counter tops made of synthetic materials such as laminex, melamine and formica.

METHOD #6: "LIBUN KAL" (LIGHT HEATING METHOD)

Some items may be *kashered* by the application of a flame (such as a blow-torch flame) to the point where straw or paper will begin to smoulder if applied to the **other** side of the utensil being heated in this manner. These items are those that have **indirectly** absorbed *Chometz* by means of strong heat without the medium of a liquid.

1. The temperature required to be reached on the other side of the utensil being heated has been estimated as being 72 degrees Celsius. (The temperature on the side being heated would be well in excess of that.)
2. The temperature required for "*libun kal* – light heating" without a direct flame application (such as when *kashering* the walls of an oven) is estimated at leaving the oven on for 2 hours at 190 degrees Celsius, 1.5 hours at 235 degrees Celsius and 1 hour at 290 degrees Celsius
3. This method does not require a 24 hour waiting period prior to it being used for *kashering*.
4. The utensil being *kashered* by this method requires the prior removal of all surface dirt in the first instance. If this is not possible then the flame must be applied to each side of the vessel upon which there is surface dirt. This should be done in a manner that ensures that straw or paper would be singed on the other side of each side being heated.
5. This method of kashering can be used as a substitute for items requiring the "*hagala* – scalding" method of *kashering* (Method #4) if they are able to withstand the heat generated.
6. An acceptable alternate method to achieve the degree of heat required for this method of kashering would be to place the utensils in a self-cleaning oven. The temperatures generated by the self-cleaning process are certainly considered sufficient to be acceptable as a proper "*libun kal*".

Items in this category include interior walls of ovens and stove catchment plates that do not come in direct contact with the pots and pans used for cooking.

METHOD #7: "LIBUN GOMUR" (GLOWING METHOD)

Items that absorb *Chometz* by direct contact by means of an open flame without the medium of a liquid may only be *kashered* by being heated to the point where it becomes red-hot. This is usually accomplished by means of a blow torch or some other strong open flame played over the entire surface of the item. No prior cleaning or waiting period is required for this method of kashering as the intense heat removes all traces of *Chometz* – both that which is on the surface and that which is absorbed into the utensil.

Items to be kashered by this method include fry pans, baking pans, barbecue grates and stove and oven parts that come in direct contact with *Chometz* pans or food.

GENERAL CLEANING

All areas of the house including garages and storage sheds, wherever *Chometz* may have been used or brought into during the year require a thorough cleaning to remove all traces of residual *Chometz*. Those cupboards or rooms that will be sealed or locked and rented to a non-Jewish person over Pesach (see the section entitled SELLING THE CHOMETZ) do not require cleaning.

THE KITCHEN

Chometz utensils not being kashered for use on Pesach: These should be well cleaned and put away in cupboards or in a room that will not be opened during Pesach.

All *Chometz* food that will not be eaten before Pesach and will not be disposed of but will be sold should likewise be locked away in a designated cupboard or room that needs to be rented to a non-Jewish person for the duration of Pesach (see the section entitled SELLING THE CHOMETZ). These cupboards or rooms should be locked and/or sealed with tape for example so that their contents are not accidentally used during Pesach.

KASHERING: PREPARING KITCHEN & HOUSEHOLD ITEMS

Below is a list of common items & materials & the method that may be used for preparing them for Pesach use:

ITEM	METHOD OF PREPARATION
BAKING PANS AND OTHER UTENSILS USED IN THE OVEN WITH LITTLE OR NO LIQUID	METHOD #7. AS THIS IS USUALLY IMPRACTICAL, IT IS RECOMMENDED THAT THESE NOT BE <i>KOSHERED</i> AND NEW ONES PURCHASED FOR PESACH.
BBQ (PLATES AND GRATES):	METHOD #7
BENCHTOPS FORMICA, LAMINEX OR OTHER SYNTHETIC MATERIALS):	METHOD #2 OR ACCORDING TO A NUMBER OF AUTHORITIES METHOD #5
BENCHTOPS (GRANITE/STONE)	METHOD #5
BENCHTOPS (METAL):	METHOD #5 OR #6
CAESARSTONE	SEE BENCHTOPS (GRANITE/STONE)
CANDLESTICKS & CANDLESTICK TRAYS	METHOD #1. SOME THEN PLACE FOIL UNDERNEATH THE TRAY.
CHINA WARE	CANNOT BE <i>KASHERED</i>
CORELLE	SEE GLASS
CORNINGWARE	SEE GLASS
CROCKERY	CANNOT BE <i>KASHERED</i>
CRYSTAL (USED MOSTLY WITH COLD LIQUIDS)	METHOD #3
CUPBOARDS	METHOD #1
CUTLERY (METAL WITH JOINTS OR DEEP ENGRAVINGS THAT CANNOT BE CLEANED PROPERLY.)	SHOULD NOT BE <i>KASHERED</i> UNLESS THE JOINTS OR ENGRAVINGS ARE SUBJECT TO METHOD # 6 (BY MEANS OF AN OPEN FLAME) IN WHICH CASE THEY SHOULD THEN BE FULLY <i>KASHERED</i> WITH METHOD # 4.
CUTLERY (METAL WITHOUT JOINTS)	METHOD #4
DISHWASHERS	SOME AUTHORITIES ALLOW THE KASHERING OF DISHWASHERS WITH STAINLESS STEEL INTERIORS BY METHODS #4 OR #5. OTHERS ALSO ALLOW KASHERING WITH PLASTIC INTERIORS BUT NOT ENAMEL. THIS CAN BE A COMPLICATED PROCEDURE. NEW BASKETS ARE USUALLY REQUIRED. PLEASE CHECK WITH YOUR RABBI FOR DETAILS.
DURALEX	SEE GLASS
ENAMEL OR ENAMEL COATED EARTHENWARE AND CERAMIC UTENSILS	CANNOT BE <i>KASHERED</i>
ELECTRIC JUG	METHOD #4
FOOD PROCESSOR (ATTACHMENTS)	METHOD #4
FOOD PROCESSOR (BASE)	METHOD #1 AND THEN COVER IT WITH PLASTIC OR FOIL
FORMICA	MANY AUTHORITIES PERMIT KASHERING WITH METHOD #5
FRYING PANS AND OTHER UTENSILS USED ON THE STOVE WITH LITTLE OR NO LIQUID	SEE BAKING PANS.
GENERAL AREAS INCLUDING CHAIRS, FLOORS, CUPBOARDS ETC	METHOD #1
GEORGE FORMAN GRILL	SHOULD NOT BE <i>KASHERED</i> .
GLASS (WHEN USED WITH HOT <i>CHOMETZ</i> IN AN OVEN OR ON A STOVE)	SHOULD NOT BE <i>KASHERED</i> . (SEPHARDIM PERMIT USING AND/OR KASHERING GLASS - CHECK WITH YOUR RABBI)
GLASS (WHEN USED WITH HOT OR COLD LIQUIDS NOT TAKEN DIRECTLY FROM AN OVEN OR STOVE FLAME)	SOME AUTHORITIES DO NOT ALLOW <i>KASHERING</i> OF GLASS FOR PESACH OTHERS ALLOW METHOD # 3
GRANITE	METHOD #5
GRILL	METHOD #7 – AS THIS CAN DAMAGE OR DESTROY THE ITEM IT IS RECOMMENDED NOT TO <i>KASHER</i> IT.
HOT PLATES	SEE STOVES OR SHABBOS HOT-PLATES
KIDDUSH CUPS (METAL)	METHOD #4
LAMINEX	SEE PLASTIC
MELAMINE	SEE PLASTIC
MELMAC	SEE PLASTIC
MICROWARE OVEN (CONVECTION)	SEE OVEN (NOT SELF CLEANING)
MICROWAVE OVEN (NON-CONVECTION)	SEE SEPARATE SECTION MICROWAVE OVENS
MIXERS	SEE FOOD PROCESSORS
OVENS (NOT SELF CLEANING) -INTERIOR AND WALLS	METHOD #6

ITEM	METHOD OF PREPARATION
OVENS (NOT SELF-CLEANING) - GRATES AND SHELVING THAT COME IN DIRECT CONTACT WITH PESACH UTENSILS OR FOOD	METHOD #7 IN THE FIRST INSTANCE – IF THIS WILL DAMAGE OR DESTROY THE ITEM METHOD #6 IS ACCEPTABLE IF A PIECE OF FOIL OR A METAL TRAY IS LATER PLACED BETWEEN THE SHELF AND THE PESACH ITEM PLACED IN THE OVEN.
OVENS (SELF CLEANING)	REMOVE ALL GRATES & CLEAN THEM AND SURFACE AREA WHERE FOOD MAY FALL REPLACE GRATES AND THEN TURN ON SELF CLEANING CYCLE.
PANTRY	METHOD #1. SOME ALSO COVER THE SHELVES.
PLASTIC – WHEN USED FOR COLD STORAGE OF <i>CHOMETZ</i> FOR LONGER THAN 24 HOURS	A NUMBER OF AUTHORITIES PERMIT KASHERING WITH METHOD #3 OR #4 OR BY POURING BOILING WATER OVER THE ENTIRE SURFACE
PLASTIC - WHEN USED IN DIRECT CONTACT WITH HOT <i>CHOMETZ</i> IN AN OVEN OR ON A STOVE	SHOULD NOT BE <i>KASHERED</i>
PLASTIC - WHEN USED WITH HOT OR COLD LIQUIDS	A NUMBER OF AUTHORITIES PERMIT KASHERING WITH METHOD #4
POTS AND PANS – WHEN USED WITH LIQUIDS.	METHOD #4. LIDS AND ALL REMOVABLE HANDLES SHOULD BE <i>KASHERED</i> SEPARATELY. IF THE HANDLES CANNOT BE REMOVED AND GAPS EXIST BETWEEN THE HANDLE AND THE WALL OF THE POT, AND THE GAPS CANNOT BE PROPERLY CLEANED, THEN THE POT OR LID MAY NOT BE <i>KASHERED</i> .
PYREX	SEE GLASS
REFRIGERATORS AND FREEZERS	METHOD #1. IT IS ADVISABLE TO THEN COVER SHELVES THAT COME IN DIRECT CONTACT WITH PESACH FOOD OR COOKING UTENSILS.
RUBBISH BINS AND VACUUM CLEANERS	METHOD #1. DISPOSE OF RUBBISH IN WHEELY BIN AND PLACE BIN OFF ONE'S PROPERTY BEFORE TIME OF REMOVAL OF <i>CHOMETZ</i> ON EREV PESACH.
SHABBOS BLECH	AS THIS USUALLY REQUIRES METHOD #7 IT IS ADVISED TO HAVE A NEW ONE FOR PESACH USE.
SHABBOS HOT PLATE (WITH INTERNAL ELEMENTS THAT DO NOT BECOME RED HOT)	CANNOT BE <i>KASHERED</i> BUT CAN BE CLEANED AND THE TOP COVERED WITH METAL SHEET UPON WHICH ONE MAY COOK. (NOTE: IT IS DANGEROUS TO COVER THE ENTIRE HOTPLATE IN FOIL)
SILVERSTONE	SEE PLASTIC
SINKS - METAL	METHOD #5 OR #6. DRAIN AREAS SHOULD BE CLEANED USING A STRONG DRAIN CLEANER. TAPS AND FAUCETS SHOULD BE CLEANED WITH A STRONG DETERGENT SOME ALSO POUR BOILING WATER POURED OVER THEM.
SINKS – PORCELAIN OR CERAMIC	CANNOT BE <i>KASHERED</i> . PLASTIC OR METAL COVERINGS AND INSERTS SHOULD BE USED. HOT WATER SHOULD NOT BE ALLOWED TO BACK UP FROM THE NON- <i>KASHERED</i> SINK INTO THE INSERTS ON PESACH
SODA STREAM MACHINE	WASH THOROUGHLY INCLUDING NEEDLE. IF PLASTIC BOTTLE HAS BEEN USED FOR FLAVOURS, REPLACE PLASTIC BOTTLE.
STONEWARE	METHOD #4
STOVES: ACTUAL ELECTRIC PLATES OR COILS	CAN BE <i>KASHERED</i> BY TURNING THEM ON AND ALLOWING THEM TO BECOME RED-HOT
STOVES: (ELECTRIC/GAS) - ALTERNATE METHOD	THOROUGHLY CLEAN THE STOVE WITH A STRONG CLEANER AND THEN COVER THE ENTIRE TOP WITH A METAL SHEET (<i>BLECH</i>) UPON WHICH ONE MAY COOK ON PESACH.
STOVES: (ELECTRIC/GAS) - GAS JETS AND CATCHMENT AREA OR PLATES DIRECTLY BENEATH THE FLAME AND POTS	METHOD #6 OR CHANGE FOR PESACH. METHOD #2 WOULD ALSO BE ACCEPTABLE FOR CATCHMENT AREAS IF IT IS ENSURED THAT THE A DOUBLE COVERING IS USED AND THE COVERING IS STRONG AND HEAT- PROOF
STOVES: (ELECTRIC/GAS) - GRATES THAT HOLD THE POTS DURING COOKING THAT COME IN DIRECT CONTACT WITH THE POT	METHOD #7 OR CHANGE FOR PESACH
STOVES: (ELECTRIC/GAS) - SIDES AND BODY OF THE STOVE THAT MAY COME IN CONTACT WITH POTS AND PANS	METHOD #2
STOVES: GLASS TOP (ELECTRIC OR GAS WITH EXTERNAL COILS OR GAS JETS)	COILS, HOT PLATES, GAS JETS, CATCHMENT PLATES AND AREAS SHOULD BE <i>KASHERED</i> AS FOR A REGULAR STOVE. THE GLASS BODY OF THE STOVE SHOULD THEN BE COVERED WITH A METAL SHEET (PERFORATED ABOVE THE FLAME AREA TO AVOID EXCESSIVE HEAT BUILD-UP AND THE SHATTERING OF THE GLASS PLATE).
STOVES: GLASS TOP (ELECTRIC WITH ELEMENTS IMBEDDED IN THE GLASS)	CANNOT BE <i>KASHERED</i> FOR PESACH
TABLECLOTHS & CLOTH SERVIETTES	CAN BE LAUNDERED WITH HOT WATER AND DETERGENT BUT REPLACING RECOMMENDED
TABLES (NOT COMING IN CONTACT WITH ITEMS TAKEN DIRECTLY FROM THE STOVE)	METHOD #2 OR #5
TEA TOWELS, OVEN MITTS & POTHOLDERS	CAN BE LAUNDERED WITH HOT WATER AND DETERGENT BUT REPLACING RECOMMENDED

ITEM	METHOD OF PREPARATION
TEFLON COATED POTS AND OTHER UTENSILS	TEFLON LINED BAKING PANS, FRY PANS AND OTHER UTENSILS USED DIRECTLY ON THE FIRE OR IN OVENS CANNOT BE KASHERED FOR PESACH. FOR TEFLON LINED POTS AND OTHER UTENSILS USED WITH HOT LIQUIDS, SOME AUTHORITIES ALLOW THEM TO BE KASHERED AS FOR PLASTIC (SEE ABOVE).
URN	METHOD #4. BOILING WATER SHOULD ALSO BE ALLOWED TO RUN OUT OF THE TAP AT THE BOTTOM AND IT IS ALSO PREFERABLE TO POUR BOILING WATER OVER THE EXTERNAL PART OF THE TAP AT THE BOTTOM.
WOOD	METHOD #4 OR #5

MICROWAVE OVENS

Microwave ovens are unique in that the heat produced emanates from the food rather than the microwaves themselves. As such the following kashering method is considered by many authorities as being acceptable:

1. The microwave oven should be cleaned of all surface dirt and not used for 24 hours.
2. A glass of water should then be placed in the oven and the oven turned on so that the water boils and spreads steam throughout the entire oven.
3. Once this has occurred the oven should be turned off, the glass moved to another area of the oven and the oven turned on again until the water boils again and spreads steam through the oven.
4. The oven should then be turned off and wiped down with cold water and a clean cloth.
5. Ovens with stainless steel interiors need no further preparation.
6. Ovens that have enamel coated walls should then be lined with thick cardboard to avoid actual contact with Pesach foods or utensils.
7. All turntables, trays or racks upon which food is actually placed should be changed, *kashered* separately (after cleaning) with the “*hagala – scalding*” (method #4 outlined above) or carefully covered, after thorough cleaning, with a double layer of plastic cling-wrap.

Combination convection and microwave ovens need to be treated as a regular oven and *kashered* accordingly.

NESPRESSO MACHINES

Suggested method to *Kasher* a Nespresso machine.

If non-Kosher for Pesach Pod varieties have been used, *kashering* is not recommended.

Assuming only Kosher for Pesach Pod varieties were used then:

1. Clean thoroughly
2. Remove nozzles from steamer
3. Replace washers with new washers
4. Reassemble
5. Fill with fresh water and steam right through

THERMOMIXES

There are two models of the Thermomix on the market, the older TM31 and newer TM5, both can be *kashered* in a similar fashion.

1. Dismantle all parts, including rubber seals under the lid and the sealing ring of the mixing knife and clean thoroughly.
2. Do not use for 24 hours prior to *kashering*.
3. Immerse all parts – bowl, varoma, lids, spatulas etc as per normal *hagola* guidelines (except the base unit of course) (do not leave the plastic parts, especially the mixing bowl lid in the hot water for too long).
4. Clean the base unit with a damp clean cloth (no water or dirt should enter the base unit).
5. Reassemble (ensure the sealing ring of the knife is in place properly and the contact pins of the mixing bowl are thoroughly dried) and heat 2L (TM31)/2.2L (TM5) of water to highest temperature.
6. Cover the base unit with glad wrap as best as possible.

GUIDELINES FOR CLEANING FOR PESACH

Rabbi Mordechai Gutnick, Rabbinic Administrator

GENERAL CLEANING

While a thorough cleaning to remove all chometz is required before Pesach this can sometimes become a very overwhelming task. Listed below is a guide that outlines the bare minimum that one should try to achieve.

PLEASE REMEMBER

- Simchas Yomtov (being joyous on Yomtov) is a Torah requirement - for men, women, and children.
- Not getting angry is also a Torah requirement generally.
- Looking after your health is a Torah obligation.
- Looking after your family is most important - especially your children.
- You are only human. The Torah was not given to angels and Hashem does not expect us to do more than we are capable of.

- It is improper to complain about the work and effort required in preparing for Pesach (and not good for our kids to hear) so we need to make things easier for ourselves as required.
 - Reach out for help if you need it.
1. Rooms into which one never brings Chometz, do not require cleaning. A superficial visual check is all that is required. Unfortunately, if one has young children at home the above leniency does not apply, and a more thorough cleaning must be done as per the guidelines below.
 2. Cleaning of areas out of usual reach (such as top of and inside cupboards and bookcases) do not require cleaning even if one has young children.
 3. Hard to access places:
 - a. One does not need to move heavy furniture to clean under or behind them (e.g., dishwashers, fridge, bookcases, sideboards, piano).
 - b. One does not need to reach behind or into deep places beyond where their hand can reach e.g., cracks in floorboards, behind furniture, down the side of the couch.
 4. Areas and cupboards being sold with the chometz;
 - a. Rooms and cupboards that are being included in the sale of Chometz do not need to be cleaned.
 - b. Items being stored in these rooms and cupboards do not need to be cleaned.
 - c. This option can be used to store away anything that you do not wish to clean (e.g. toys, kitchenware) into cupboards/rooms that are being sold.
 5. All these cupboards and rooms that are being sold should be locked or sealed with tape and labelled with a sign so that they are not inadvertently opened and accessed during Pesach.
 6. Outdoor areas do not need cleaning. It can be assumed that any chometz left outside has dissipated. A visual inspection on Erev Pesach to spot any large items and pieces for removal suffices.
 - a. Books and *Seforim*;
 - b. *Benchers* (Grace after meals booklets) that are used throughout the year with Chometz meals should be put away together with other chometz utensils etc. to be sold. One should either get new ones for Pesach or use a *Haggadah*.
 - c. *Siddurim* or other *seforim*, books or magazines that have been used the whole year round in proximity to, or in contact with, food should likewise be put away and not used on Pesach – unless one wants to go to the bother of checking and cleaning them thoroughly.
 7. Other *seforim* and books do not technically need to be checked/cleaned.
 8. Clothing that has been washed or dry cleaned and put away does not need checking.
 9. Cleaning that is not required:
 - a. Steam cleaning is not required.
 - b. Window cleaning is not required.
 - c. Curtain cleaning is not required.
 - d. General dusting is not required – dust is not Chometz.
 - e. Removing cobwebs is not required.
 - f. Washing or wiping down ceilings, walls, skirtings, windowsills, furniture, shelves and cupboard doors are not required unless there is visible Chometz stuck on them.
 10. The above applies in the bathroom for showers, baths, toilets etc. A regular bathroom clean is more than sufficient.
 11. Rooms with carpets should be vacuumed as usual. Use a nozzle to reach under furniture and along skirtings.
 12. Floors should be swept well (or vacuumed).
 13. Floors should be mopped with using a good detergent cleaner.
 14. Crevices around skirting boards and kitchen benches and under the fridge/dishwasher etc. should be sprayed with a strong cleaning detergent. This destroys the viability of any Chometz crumbs or remnants that cannot be reached for removal.
 15. Outdoor garbage bins do not need to be washed. They and their contents can be put out on the nature strip before the time of removal of chometz and the contents being considered as ownerless. If you wish to use the garbage bin on Pesach, it is enough to pour a strong chemical detergent or bleach over any remaining rubbish at the bottom of the bin.

THE KITCHEN

Areas where food is prepared and will come into contact with Pesach food or utensils require a greater degree of cleaning.

1. **Kashering** of chometz utensils, stoves, ovens, sinks, and counters needs to be carried out as for any Pesach. See details in the Kosher Australia Pesach Guide.
 - a. This includes cleaning the fridge and/or freezer properly of all surface dirt (care being given to the rubber seals that usually catch food residue). It is recommended to then cover the shelves that actual food may be placed on.
 - b. Tables - clean well and cover. If covered with a waterproof covering, they do not need any form of *kashering*.

2. **Cupboards and drawers** that are not being used for Pesach should be locked or otherwise sealed with tape or the like. They do not need to be cleaned. Their contents can be sold with the Chometz.
3. **Chometz pots, pans, kitchenware, cutlery, crockery** etc. that are not being *kashered* for Pesach use, should be put away in the closed and sealed cupboards for sale with the chometz to be sold with the Chometz. They do not need to be cleaned.
4. **Cupboards and drawers** that are being used for Pesach should be cleaned properly and preferably lined for Pesach use.
5. **Walls and skirtings** where food is likely to have touched or splattered should be cleaned.
6. **Kitchen and dining chairs** – clean all visible Chometz.
7. **Baby highchair** – thoroughly clean. Pour boiling water over tray and/or cover tray with contact paper.

PESACH LAWS - CONCEPTS

Please Note: Due to the multitude of laws governing the Pesach Yom Tov and its preparation, the digested laws that follow should be viewed solely as a summary of the halachos pertaining to the proper observance of the holiday. Contact your local Orthodox Rabbi for further information concerning any doubtful halachic decision.

All times referred to below can be found in the chart at the start of this booklet for times where you live.

CHOMETZ

Chometz results when one of the five types of grain (wheat, barley, rye, oats, spelt) or their derivatives is permitted to maintain undisturbed contact with water for a period of 18 minutes or longer.

Extracts of Chometz, alcoholic fermentation, foods processed in Chometz, utensils and Chometz admixtures are halachically considered Chometz as well. The Torah forbids an individual to eat, possess or derive benefit from Chometz during the Pesach Yom Tov.

Ashkenazi Jews refrain from partaking of legumes (beans, corn, rice, peas) known as 'Kitniyos' and their admixtures during Pesach.

REMOVAL OF CHOMETZ

Prior to Pesach, one must remove all Chometz from one's properties and jurisdiction (including premises, offices, factories etc belonging to a Jew). This is accomplished through the following processes:

MECHIRAS CHOMETZ (THE SALE OF CHOMETZ)

All forms of Chometz not destroyed must be transferred to a Gentile before the end of the "fifth hour" on the 14th Nisan. This is normally done through the sale of Chometz via the Congregational Rabbi as appointed agent for this sale. The sale is bona fide in nature and transfers possession of all Chometz to the Gentile accompanied by the sub-leasing of the property on which the Chometz is to be found.

The non-Jew should be allowed free access to the property and items he has purchased.

Chometz utensils are rented, and its contents are sold.

The Mechiras Chometz form can be completed online or downloading the form or WhatsApped to Kosher Australia.

The link to sell online is available via our website, Facebook page and app and at the end of this guide – see the box on page 71.

Please note that if you are travelling overseas and your Chometz is situated locally it is strongly recommended that you sell your Chometz in Australia. Rabbi Gutnick has advised that for the Chometz he sells the 'buy back' after Pesach takes into account people who are overseas. (See 'GUIDELINES FOR LEAVING HOME BEFORE PESACH')

BEDIKAS CHOMETZ (THE SEARCH)

After tzais hakochavim (appearance of 3 stars) on the evening of 14th of Nisan one must diligently search for Chometz in all areas in which it may have been stored or eaten. This search is not ceremonial in nature and must include such places as: closets, toasters, medicine cabinets, clothes, cars, toy chests, vacuum bags etc. As such, proper time must be allotted to the search.

No work, study or meal should be begun within ½ hour prior to the search.

The search should be facilitated by the aid of a single-wick candle.

Prior to the search the blessing *al biur Chometz* is recited. It is a custom for some to scatter 10 pieces of bread throughout the house prior to the bedikah and to collect them during the search. The mere collection of these pieces should not be misconstrued as the fulfilment of the search.

For those leaving their home before Pesach please see the section 'GUIDELINES FOR LEAVING HOME BEFORE PESACH' on how to conduct the search for Chometz.

Bedikas Chometz takes place this year on Tday evening 4th April after nightfall.

BITTUL HECHOMETZ (NULLIFICATION)

After the search Kol Chamiroh is recited renouncing title to any Chometz not already set aside for either the next morning's breakfast sale or destruction. One who does not understand Aramaic should recite Kol Chamiroh in his or her native tongue.

The English translation of the Aramaic formula for Bitul Chometz recited after the burning follows:

I HEREBY DECLARE ALL LEAVEN AND CHOMETZ IN MY POSSESSION THAT I HAVE NOT DISCOVERED OR HAVE NOT REMOVED AND NOT AWARE TO BE NULLIFIED AND OWNERLESS LIKE THE DUST OF THE EARTH.

BIUR CHOMETZ (DESTRUCTION OF THE CHOMETZ) & EREV PESACH

In gratitude to the Almighty for having been spared during the slaying of the Egyptian first-born, first-born males fast on Erev Pesach. A father fasts on behalf of a son too young to fast and a mother fasts for her b'chor when the father is a first-born as well. Firstborns may participate in a Seudas Mitzvah which enables them to eat during the remainder of the day. Fast of the First Born commences at dawn and ends at nightfall. If completing the fast. For times this year, see the chart in the beginning of this publication.

The Rabbinic prohibition for eating Chometz begins with the commencement of the halachic fifth hour of the day.

Finish eating Chometz (& Kitniyos) at the times listed in the chart.

Chometz found during the search and remaining from breakfast must be destroyed (preferably by fire) during the fifth hour of the "halachically-divided 12 hour day." This is followed by a more encompassing bittul nullifying all Chometz seen or unseen. This cannot be recited during the halachic sixth hour of the day when the use of Chometz and its benefits are already forbidden.

Remove Chometz & recite Kol Chamira about an hour later as listed in the chart.

It is forbidden to eat matzoh or consume wine on Erev Pesach. One may eat fish, fruit and meat in moderate amounts that will not detract from one's appetite for the Seder Matzoh. Tedious and/or profitable work should not be engaged in after chatzos (halachic midday) on Erev Pesach.

TIMELINE FOR 2023

Times listed are for Melbourne – times for other Australian cities are to be found in the calendar at the beginning of this guide.

TUESDAY, 4TH APRIL 2023 - THE SEARCH FOR CHOMETZ (BEDIKAS CHOMETZ)

After nightfall - 6.23pm, on the evening of the day before Pesach one must diligently search for Chometz in all areas in which it may have been stored or eaten. This final search is to be conducted even if a thorough cleaning has taken place in the days or weeks before-hand. It is not ceremonial in nature. It should include such places as: closets, toasters, medicine cabinets, clothes, cars, toy chests, vacuum bags etc. No work, study or meal should be begun within ½ hour prior to the search.

The search should be facilitated by the aid of a single-wick candle. A paper bag and a feather are traditionally used to scoop up and collect any Chometz found. Prior to the search the blessing "al biyur Chometz" is recited.

It is a custom to scatter 10 pieces of bread throughout the house prior to the search and collect them during the search. However, the mere collection of these pieces should not be misconstrued as the fulfilment of the search.

For those leaving their home before Pesach please see the section 'GUIDELINES FOR LEAVING HOME BEFORE PESACH' on how to conduct the search for Chometz.

After the search, Kol Chamiroh – a statement of nullification of all Chometz - is recited renouncing title to any Chometz not already set aside for either the next morning's breakfast, sale or destruction. One who does not understand Aramaic should recite Kol Chamiroh in their native tongue.

The English translation of this Aramaic formula for Bitul Chometz reads: I DECLARE ALL LEAVEN AND CHOMETZ IN MY POSSESSION WHICH I HAVE SEEN OR NOT SEEN, WHICH I AM AWARE OF OR NOT AWARE OF, SHOULD BE CONSIDERED OWNERLESS AND AS DUST OF THE EARTH.

WEDNESDAY, 5TH APRIL 2023

1. It is forbidden to eat matzoh or consume wine on Erev Pesach. One may eat fish, fruit and meat in moderate amounts that will not detract from one's appetite for the Seder Matzoh.
Tedious and/or profitable work should not be engaged in after chatzos (midday) on Erev Pesach.
2. THE FAST OF THE FIRST-BORN. (TA'ANIS BECHORIM) - In gratitude to the Almighty for having been spared during the slaying of the Egyptian first-born, first-born males fast on Erev Pesach. A father fasts on behalf of a son too young to fast. Firstborn traditionally participate in a Seudas Mitzvah – a meal celebrating the performance of a Mitzvah - which enables them to eat during the remainder of the day. Many Shules organise such an occasion that will take place after morning services.
Fast of the First Born commences this year on Erev Pesach at 5.15am. If completed, it ends at 6.36pm.
3. Finish Eating Chometz by 10.01 am (Magen Avraham) or by 10.27 am (Vilna Gaon & Shulchan Aruch HaRav).
4. Burn Chometz by 11.12 am (Magen Avraham) or by 11.24 pm (Vilna Gaon & Shulchan Aruch HaRav).
This includes the Chometz found during the search the night before.
Another final statement nullifying all Chometz should then be made at that time. The statement reads:
I DECLARE ALL LEAVEN AND CHOMETZ THAT IS IN MY POSSESSION WHICH I HAVE SEEN OR NOT SEEN OF WHICH I AM AWARE OF OR NOT AWARE OF, WHETHER I HAVE REMOVED IT OR NOT REMOVED IT, SHOULD BE CONSIDERED NULLIFIED AND OWNERLESS AND AS DUST OF THE EARTH.
5. The Sale of the Chometz will be completed by the Rabbi by 11.12 am (Magen Avraham) or by 11.24am (Vilna Gaon & Shulchan Aruch HaRav). Ensure that the authorisation for the sale reaches the Rabbi well before this time. All forms of Chometz items not removed or destroyed and all premises that are not properly cleaned may be transferred to a Gentile before the end of the "fifth hour" on the day before Pesach. In this way the Chometz will not remain in the possession of a Jewish owner over Pesach.
This is normally done through the sale of Chometz via a rabbi well-versed in the applicable laws. He is also formally appointed as an agent by all those wishing to sell their Chometz as well. The sale is bona fide in nature and transfers possession of all Chometz to the Gentile accompanied by the sub-leasing of the property on which all Chometz is to be found. All Chometz utensils are either rented or sold and their contents are sold as well.
All Chometz and utensils that are sold must be locked away for the duration of Pesach. Premises containing Chometz that are rented to the non-Jew should not be accessed during Pesach.
The Chometz sold is then repurchased from the non-Jew after Pesach and can then be used

The Sale of Chometz form can be downloaded from our website and completed and faxed back to either (03) 9527 5665 or scanned and emailed to rabbi.mordechai.gutnick@kosher.org.au no later than 5pm on 31st March 2023 this year.

Please note that if you are travelling overseas and your Chometz is situated locally it is strongly recommended that you sell your Chometz in Australia. Rabbi Gutnick has advised that, for the Chometz he sells, the 'buy back' after Pesach takes into account people who are overseas. (See 'GUIDELINES FOR LEAVING HOME BEFORE PESACH')

6. All cleaning and kashering for Pesach should be completed by the time of burning chametz 11.12 am (Magen Avraham) or by 11.24 pm (Vilna Gaon & Shulchan Aruch HaRav).
7. Roasting of The shank bone and cooking for Shabbat shall be complete by the time Shabbat starts
8. 'Wheelie bins' should be placed outside one's property before Yomtov. (As these remain the property of the council, one may dispose of chometz in these even if the rubbish is not picked up for some days as the rubbish is considered 'ownerless'.)

CHOMETZ DISCOVERED DURING PESACH

Chometz discovered during chol hamoad should be immediately destroyed. Chometz found during Shabbos or Yom Tov should be covered with a vessel and destroyed after havdalah.

THE LAST DAY OF PESACH – THURSDAY 13th APRIL

Pesach finishes this year on Shabbat, 13th April at 6.36pm. Chometz may be eaten after approximately 7pm by which time the Rabbi would have had time to buy back the Chometz from the non-Jewish owner.

The greatest emphasis should be placed on the fact that any Chometz remaining in the possession of a Jew over Pesach cannot be eaten used bought or sold even after Pesach.

One should avoid purchasing obvious Chometz such as biscuits, breads, pasta, wheat-ethanol vodka etc from retail outlets owned by Jews who have not sold their Chometz for up to six weeks.

Major supermarket chains in Australia with significant Jewish ownership do sell their Chometz. Check with your local Jewish supermarket.

PESACH: GUIDELINES FOR THOSE LEAVING HOME BEFORE PASSOVER

Rabbi Mordechai Gutnick

BEDIKAS CHOMETZ — SEARCH FOR CHOMETZ

Anyone leaving home before the traditional evening of bedikat chometz must carry out the search in their home on the night before he or she departs. However, since this is not the normal evening for the search no brocha is recited.

Another option is to appoint a sheliach — agent — to perform the search at the normal time.

If one is selling one's home or other premises together with all chometz then the accepted ruling is that the house does not require a specific search. However, in order to fulfil the obligation of the removal of chometz one should do a search for chometz on the night before Pesach (with a brocha) wherever they may be staying over Pesach. This should be done in a rented home or hotel room or in a guest room of a private house where one is staying. In the latter case permission should be sought from the owner of the house to either act on his or her behalf by searching that guest room or else by purchasing with a nominal sum the rights to that or any other room in the house and thereby becoming its "owner".

In all circumstances on the morning of Erev Passover (**this year – Wednesday 5th April 2023**), the statement of bitul should be pronounced wherever one is before the time of removal of the chometz.

SELLING THE CHOMETZ

When someone travels before Pesach westward from Australia to Europe to Israel or to the United States for Pesach (or even from an eastern time zone to other western time zones in Australia) the festival will begin for them after it has already commenced in the home community.

If the chometz is sold where the traveller is spending Pesach this would result in a situation where the sale did not yet take place while it was already Pesach in the place where the chometz is found. The traveller would therefore own the chometz while it was already Pesach in the home community. For this reason, these travellers should arrange prior to leaving home for their chometz to be sold in their hometown in Australia at the correct time as applicable to where the chometz is stored. Any chometz still in their possession at the place they are staying after the time of the sale in their home community should then either be destroyed or sold before the appropriate time for removal of Chometz at the place where they are staying.

In such circumstances as Pesach will finish for the traveller later than in their home community the rabbi who organises the sale of the Chometz in their home community should be asked that when he purchases back the chometz after Pesach he should specifically not acquire back the chometz on behalf of the traveller until Pesach is over at the place where the traveller is.

Those travelling for Pesach from Australia to New Zealand or from the Central or Western Australian time zones to the Eastern states where Pesach commences earlier than in the home community (or for those travelling from Europe, Israel, or the US to Australia where Pesach also begins earlier than in the home community) should arrange for the sale of their chometz before the time for removal of chometz at the (earlier) time at the place where he or she is staying to ensure that no Chometz belongs to them anywhere at the time of the removal of chometz where they are staying. In such circumstances it is then also halachically preferable to ensure that when the Chometz is purchased back after Pesach the traveller specifically make a condition not to accept back ownership of the chometz left at home until Pesach finishes in the home community where that chometz is stored.

Another option when travelling in any direction is to transfer before leaving home all the chometz left at home as a gift to someone else who remains in the home community. The recipient of the gift would arrange the sale of the chometz at the correct time for that home community. The traveller would then sell or remove any chometz actually with them at the place of their stay before the appropriate time for removal of chometz at that place.

It is advisable to contact your Rabbi before leaving home to ensure that the most valid and appropriate method has been chosen in order to ensure that no chometz inadvertently remains in one's possession during any of the time that it is not permitted to possess chometz.

THE SEDER

SEDER SHOPPING LIST

Rabbi Aryeh Citron (Chabad.org)

MATZAH: It is preferable to use handmade Shmura Matzah. Every person at the Seder with their own Seder plate will need three matzahs per Seder. Those who don't have their own plate need approximately two matzahs per Seder.

MATZAH COVERS

WINE AND/OR GRAPE JUICE: It is preferable to use wine, but if one cannot, one may use a mixture of grape juice and wine, or even pure grape juice. If necessary, one may add up to 1/3 of the cup of water. If this also is not possible due to medical reasons, discuss with your doctor and rabbi.

WINE GOBLETS

HORSERADISH: One may purchase kosher for Passover ground horseradish, but it can only be used for the seder if it has no other ingredients.

ROMAINE LETTUCE (FOR BITTER HERBS): Each should eat the volume of an olive of the combination of Romaine lettuce and horseradish. A large lettuce leaf is approximately the size of an olive.

HAGGADAHS: Ideally with translation to the vernacular.

INGREDIENTS FOR CHAROSET: The custom is to use wine, ground walnuts, apples & pears. Others add: Partially ground cinnamon & ginger, figs, dates, pomegranates, and/or almonds.

SHANKBONES FOR ALL OF THE SEDER PLATES: Some have a custom is to use the neck of a chicken. Others use the leg of a chicken or an actual shankbone.

EGGS: Ashkenazi custom is to serve eggs as the first course of the meal, in addition to having one egg on each Seder plate.

A VEGETABLE FOR KARPAS: Some customs use a piece of a potato or onion. Others use celery, radishes, or parsley.

THE SEDER: FOOD TYPES & QUANTITIES USED

Rabbi Mordechai Gutnick

MATZOH

SUITABLE MATZOS

Normal machine-made matzos even if produced for Pesach under reliable supervision are almost always supervised only from the time of the milling of the flour. The supervision following this is usually a "preventative" supervision that ensures that the flour and dough do not become Chometz.

Shmura (meaning "guarded") is matzah that is supervised and protected from water that could make it Chometz already from the time of harvesting the grain. It also has a "positive" form of supervision - with the participants in its making not just ensuring that it does not become Chometz but actively expressing their intention that the matzot are made for the purpose of fulfilling the mitzvah of eating matzah on Pesach.

All major authorities state that it is the correct practice to use Shmura Matzah at the Seder at least when eating the minimum amount necessary to fulfill the obligation of eating matzah on Pesach night. This is in keeping with the pasuk "and you shall guard the matzah" (Shmos 12:17).

THE MINIMUM QUANTITIES

To fulfil the biblical obligation, one must eat just over a "k'zayis" (the size equal to the volume of an "olive"). This is traditionally termed "eating" rather than just tasting or nibbling. There is much debate on the halachic size of an 'olive' (k'zayis) as well as on the time frame allowed to consume it.

The minimum accepted size of a k'zayis is approximately 29 grams (or a volume of 29 millilitres) or 1 fluid ounce. This is considered the equivalent of 2/3 of a machine matzah - an area of approximately 14cm by 15cm - or just over 1/3 of a hand-made *shmura matzah*. It should be eaten in four minutes (leaning to the left). It is the practice to actually eat more than this minimum amount during the various stages of the Seder as outlined in the *Haggadah*.

MORROR (BITTER HERBS)

SUITABLE VEGETABLES

The Mishnah in *Pesachim* (39a) lists the ancient Hebrew and Aramaic names of five types of plants that are considered as the "Bitter Herbs" to be used on Pesach at the Seder. The commentaries on the *Shukchan Aruch* properly identify two of these species which are universally accepted as:

- 1) Romaine or Cos Lettuce stalks or leaves;
- 2) Pure Horseradish.

If neither horseradish nor Cos lettuce variety are available then the next preference should be given to ordinary lettuce (the “crisp-head” or “iceberg” variety) and the appropriate blessing over the *marror* may still be recited. In reality it is actually lettuce that is the most preferred type of *marror* even if it is not bitter. The fact that it may not have been as commonly used as horseradish was for the practical reasons that lettuce was difficult to find in Europe at the end of winter at Pesach time and/or that if it was found it was very difficult to remove the infestation found in such lettuce. The usual custom is to eat a proportionate mixture of both these varieties (lettuce and horseradish) though of course either one alone is perfectly acceptable.

It should be carefully noted however that the bitter herb must be absolutely pure. It may not be mixed with anything or preserved with anything such as vinegar that can affect its natural taste. Commercially produced Kosher for Pesach horseradish relish (white red and green) contains vinegar and other ingredients and the *brochah* over the *marror* may not be recited over such a mixture as one has not fulfilled one's obligation of eating *marror*.

If none of the above-mentioned herbs are available then any bitter vegetable may be used in order to obtain a bitter taste. However as one does not fulfill one's real obligation in this manner therefore the blessing over the *marror* may not be recited in such circumstances.

Note that although some authorities discuss the possibilities of using ordinary radish as *marror* it appears seriously questionable as to whether our common radish (with the red skin) is the same species as the one they were referring to. For this reason ordinary radish should be treated as any other bitter vegetable and not used for *marror*.

THE MINIMUM QUANTITIES

As the eating of *marror* in the absence of the Pesach rituals in the *Beis HaMikdash* is today only a Rabbinic requirement the minimum size requirements are slightly less. For horseradish the minimum size of a *k'zayis* can be taken as approximately 20 ml ($\frac{1}{3}$ oz.) or one tablespoon full. If lettuce leaves are used this is the amount of leaves that would cover an area of approximately 20 cm by 25 cm. The time allowed for consumption is 9 minutes. Note that the custom is not to lean when eating the *marror*.

HOW TO CHECK ROMAINE (COS) LETTUCE FOR INSECT INFESTATION

This lettuce type is known as an open leaf variety. This means that as they sprout forth from the ground the leaves begin to open up like a flower. Toward the end of their growth they begin to close around the stalk. Since romaine lettuce grows open it is more prone to insect infestation throughout the head than other varieties of lettuce that primarily grow as a closed ball.

We are fortunate here in Australia in that locally grown vegetables are in general not as prone to insect infestation as they are in other countries such as the US Europe and Israel. Even open leaf varieties of lettuce grown here in Australia have been found to be free of many of the insects commonly found elsewhere in these varieties.

The major concern here is largish readily identifiable green or black worms.

Technically any requirement to check this lettuce here would therefore be confined to separating the leaves rinsing them thoroughly with running water and then subjecting them to scrutiny against a good light source. Any insects that are identified during this scrutiny must be washed off and removed. Occasionally worms may be found in burrows within the body of the leaf. If you notice a narrow translucent burrow speckled with black dots breaking up the deep green colour of the leaf carefully slit the bumpy part within the burrow with a sharp knife and remove the worm.

With regard to Romaine lettuce that will be used for the fulfilment of the mitzvah of *Marror* it is particularly praiseworthy to subject this lettuce to a more thorough scrutiny and cleaning process to account for all possibilities of infestation.

In addition to the check for the worms mentioned above insects that can at times be found in local open leaf lettuce are small black or green aphids and thrips. The leaves of the vegetable can camouflage these insects. The open structure of these vegetables allows insects to penetrate the entire head. Insects may be found between the innermost layers of leaves of an infested head. Therefore each leaf should be washed and checked individually. The use of a light box for checking lettuce can be extremely convenient and helpful. However even if a light box is not used both sides of each leaf should be examined against a good source of light.

Below are the ideal step by step recommendations for how to properly check romaine lettuce for insects:

- 1) Cut off the lettuce base and separate the leaves from one another.
- 2) Soak leaves in a solution of cold water and a little soap (Kosher for Pesach). Some use salt instead of soap. The soap has the effect of loosening the grip of the insects on the lettuce leaves making them much easier to observe and remove.
- 3) Agitate lettuce leaves in the soapy or salty solution.
- 4) Spread each leaf taking care to expose all its curls and crevices. Using a heavy stream of water, remove all foreign matter and soapy or salty leaves from both sides of each leaf. Alternatively, a vegetable brush may be used on both sides of the leaf.
- 5) Leaves should be checked over a light box or against strong overhead lighting to verify that the washing procedure has been effective. Pay careful attention to the folds and crevices in the leaf where insects have been known to hold tightly through several washings.

WINE

SUITABLE BEVERAGES

All wines grape juice and other beverages mentioned below must of course bear a reliable Kosher for Pesach certification. The following are listed in order of preference:

- 1) Red wine (unless one has a white wine of superior quality) that is not sweetened with sugar (i.e. it should be naturally sweet or "dry") so that one tastes the natural taste of pure wine. It should also in the first instance not be "mevushal" (cooked or pasteurised).
- 2) Red sweetened wine or white unsweetened or sweetened wine are the next preferences. Again in the first instance it should not be "mevushal". When using white wine it is also preferable to add a little red wine to the white so that the preferred red colour is discernible.
- 3) Wine diluted with grape juice (if one finds it too difficult to drink wine, for instance due to health reasons). The stronger alcoholic taste of the wine must still be discernible.
- 4) Wine diluted with water. The general rule that covers virtually all kosher wines currently available is that the wine may be diluted to as much as one part wine to one part water. Such a mixture may still be used for the Seder and the blessing for wine still recited.
- 5) Pure grape juice.
- 6) Grape juice diluted with water in the proportion of one part water to one part of grape juice.
- 7) As a last resort such products as raisin wine or any other popular, yet distinguished (kosher for Pesach) beverage may be used. (Note that the correct *brocho* for the particular beverage used should be recited if it is not *Borei Pri HaGofen* e.g. *Shehakol*.)

THE MINIMUM QUANTITIES

"Drinking" is defined as at least half a cup of wine for each of "the four cups" — the cup having a volume of at least 86 millilitres (approximately 3 fluid ounces). The wine should be drunk each time without interruption while leaning to the left and may take up to 9 minutes to finish.
